-

1. Introduction

This document explains common questions and issues faced by Google Chrome users. It helps users understand the app's basic functioning and features.

2. Scope

This document covers questions related to:

- General features and functioning
- Installation and login
- Troubleshooting common issues
- Privacy and security

3. Target Audience

This document is intended for:

- End users
 - IT support teams
 - Technical support professionals
-

4. General FAQs

Q1. What is Google Chrome?

A: Google Chrome is a free web browser developed by Google that allows its users to access websites on the internet.

Q2. Which operating systems are supported for using Google Chrome?

A: Operating systems that support Google Chrome:

- On mobile:
 - Android (Android 8.0 or later)
 - iOS (iOS 16 or later)
- On desktop:
 - Windows (Windows 10 or later)
 - macOS (macOS 11 (Big Sur) or later)
 - Linux (64-bit Linux distribution with glibc 2.17 or later)

5. Installation FAQs

Q1. How do I install Google Chrome on Windows?

A:

1. Go to the official website of Google Chrome.
2. Click **Download Chrome** and wait for the download to complete.
3. Run the installer file to install Google Chrome on your system.

Q2. Why does installation fail?

A: Installation failure happens due to insufficient disk space, a corrupted installer file, and an outdated OS.

6. Account & Login FAQs

Q1. How do I log in to Google Chrome?

A:

1. Click the **Profile icon** in the top right corner
2. Click **Sign in to Chrome**
3. Enter your **email address** > click **Next**
4. Enter your **password** > click **Next**

Q2. Why am I unable to log in?

A: Ensure a stable internet connection and verify that the entered credentials for login are correct.

7. Feature FAQs

Q1. How do I set Chrome as the default browser?

A:

1. Open **Chrome** > **Settings** > **Default browser**
2. Click **Make Default** to set Chrome as the default browser.

Q2. How do I clear the cache?

A: For clearing cache:

- On desktop (Windows/macOS/Linux):
 1. Open **Chrome** > **Settings**
 2. Go to **Privacy and security** > **Clear browsing data**
 3. Select **Cached images and files** > Click **Clear data**

- On mobile:

Android:

1. Open **Chrome**
2. Tap on the **three-dot menu** (⋮) > **Settings**
3. Tap **Privacy and security** > **Clear browsing data**
4. Select **Cached images and files**
5. Tap **Clear data**

iOS:

1. Open **Chrome**
2. Tap on the **three-dot menu** (⋮) > **Settings**
3. Tap **Privacy** > **Clear Browsing Data**
4. Select **Cached Images and Files**
5. Tap **Clear Browsing Data** to confirm

8. Troubleshooting FAQs

Q1. Chrome fails to update. Why?

A: Update failure occurs due to insufficient disk space. Ensure a stable internet connection > confirm there is enough disk space for the update; if not, clear some space.

Q2. Why is the application running slowly?

A: Slow performance may occur due to too many open tabs, outdated Chrome version, or insufficient system memory. Try closing unused tabs, clearing cache, or updating Chrome via **Settings > Help > About Google Chrome**.

9. Security & Privacy FAQs

Q1. Is user data encrypted?

A: Google Chrome uses encryption, sandboxing, Safe Browsing, and automatic updates to protect user data.

Q2. How is personal information protected?

A: Personal information in Google Chrome is protected through encryption, sandboxing, Safe Browsing security checks, automatic updates, and secure account authentication, like two-step verification.
